The stove systems of the 25 series have two saucepans (1.75 and 1.5 liters), a 22cm frying pan, upper and lower windshields, a burner, a pot grip and a strap. Comes supplied with a 0.9lt kettle. Materials: Hard Anodised Ultralight Aluminium Weight: 1055gm

61312

FRYPAN SMALL (27)

Made in the new aluminium alloy which is 50% stronger than ordinary aluminium, the Ultralight frypan is thinner and lighter, and even more resistant to scratching and wear ! For the 27 series.

61313

FRYPAN SMALL (27-T)

This is a 18cm frypan with non-stick coating requiring little to no cooking fat. Washing up is easier as nothing sticks. Use only wooden or plastic utensils to avoid scratches or abrasions. For the 27 series.

TRANGIA Catalogue

61346

FRYPAN S27 HARD ANODISED

The ultralight hard anodized frypan has even more resistance to scratching and wear due to the new ultralight aluminium, and the hard anodizing is a surface treatment that also improves corrosion resistance. Also the treatment makes the saucepans easier to clean than untreated saucepans. Giving a 40 micrometre thick coat, hard anodizing leaves a surface that is one of the market's hardest. For the 27 series.

61336

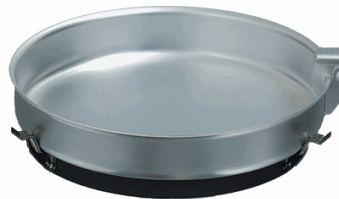

FRYPAN S25 HARD ANODISED

The ultralight hard anodized frypan has even more resistance to scratching and wear due to the new ultralight aluminium, and the hard anodizing is a surface treatment that also improves corrosion resistance. Also the treatment makes the saucepans easier to clean than untreated saucepans. Giving a 40 micrometre thick coat, hard anodizing leaves a surface that is one of the market's hardest. For the 25 series.

61310

FRYPAN LARGE (25)

Made in the new aluminium alloy which is 50% stronger than ordinary aluminium, the 22cm Ultralight frypan is thinner and lighter, and even more resistant to scratching and wear! For the 25 series.

61311

FRYPAN LARGE (25-T)

This is a 22cm frypan with non-stick coating requiring little to no cooking fat. Washing up is easier as nothing sticks. Use only wooden or plastic utensils to avoid scratches or abrasions. For the 25 series.

61344

SAUCEPAN 1 O D (27)

61345

SAUCEPAN 1 I HA (27)

The ultralight hard anodized 1 litre saucepan has even more resistance to scratching and wear due to the new ultralight aluminium, and the hard anodizing is a surface treatment that also improves corrosion resistance. Also the treatment makes the saucepans easier to clean than untreated saucepans. Giving a 40 micrometre thick coat, hard anodizing leaves a surface that is one of the market's hardest. For the 27 series.

TRANGIA Catalogue

61319

SAUCEPAN 1 O (27) OUTER

Made in the new aluminium alloy which is 50% stronger than ordinary aluminium and thus we can use less to get equivalent strength. The 1 litre graduated outer Ultralight saucepan is thinner and lighter, and even more resistant to scratching and wear! For the 27 series.

61320

SAUCEPAN 1 I (27) INNER

Made in the new aluminium alloy which is 50% stronger than ordinary aluminium and thus we can use less to get equivalent strength. The 1 litre ungraduated inner Ultralight saucepan is thinner and lighter, and even more resistant to scratching and wear! For the 27 series.

61321

SAUCEPAN 1 O T (27)

The 1 litre graduated outer Ultralight saucepan is made with non-stick coating requiring little to no cooking fat. Washing up is easier as nothing sticks. Use only wooden or plastic utensils to avoid scratches or abrasions. For the 27 series.

61322

SAUCEPAN 1 I T (27)

The 1 litre ungraduated inner Ultralight saucepan with non-stick coating requiring little to no cooking fat. Washing up is easier as nothing sticks. Use only wooden or plastic utensils to avoid scratches or abrasions. For the 27 series.

61314

613517 HA

TRANGIA WINDSHIELD U27 HARD ANODISED

The upper ultralight hardanodized windshield for the 27 series is made from ultralight aluminium (lighter, harder and more durable) and is hard anodized giving a 40 micrometre thick coat. Hard anodizing leaves a surface that is one of the market's hardest. The heart of the storm-proof stove system is the two-part windshield. The ventilation holes in the lower windshield are turned to face into the wind to increase the oxygen supply to the burner. If the wind becomes too strong, the stove is turned to maintain the required flame.

613527 HA

TRANGIA WINDSHIELD L27 HARD ANODISED

The lower ultralight hardanodized windshield for the 27 series is made from ultralight aluminium (lighter, harder and more durable) and is hard anodized giving a 40 micrometre thick coat. Hard anodizing leaves a surface that is one of the market's hardest. The heart of the storm-proof stove system is the two-part windshield. The ventilation holes in the lower windshield are turned to face into the wind to increase the oxygen supply to the burner. If the wind becomes too strong, the stove is turned to maintain the required flame.

613527

TRANGIA WINDSHIELD L27

The lower windshield for the 27 series is made from ultralight aluminium, is lighter, harder and more durable. The heart of the storm-proof stove system is the two-part windshield. The ventilation holes in the lower windshield are turned to face into the wind to increase the oxygen supply to the burner. If the wind becomes too strong, the stove is turned to maintain the required flame.

613517

TRANGIA WINDSHIELD U27

The upper windshield for the 27 series is made from ultralight aluminium, is lighter, harder and more durable. The heart of the storm-proof stove system is the two-part windshield. The ventilation holes in the lower windshield are turned to face into the wind to increase the oxygen supply to the burner. If the wind becomes too strong, the stove is turned to maintain the required flame.
